Alternative #2 – Direct Loan with Wells Fargo

- Option 2 submitted by Wells Fargo
- Series 2000 bonds are refunded by a directly placed bank loan from Wells Fargo at a rate of 70% LIBOR + 80bps
- The variable rate on the swap is amended so that the IDB receives 70% of LIBOR to match what is paid on the direct loan, thereby eliminating any basis risk
- Wells Fargo would lower the swap rate to 5.01% to reflect the amended index
- While not explicitly mentioned in the proposal PFM expects the term length to be 3-5 years

Alternative #2B – Direct Loan with Wells Fargo

- Variation on option 2 submitted by Wells Fargo, allowing the IDB to benefit from Bank Qualified status (Par amount < \$30MM per calendar year)
- In 2010, 50% of the Series 2000 bonds are refunded by a direct loan from Wells Fargo, we expect that rate to be more competitive, for example 66% LIBOR + 75bps
- The variable rate on the existing swap is amended so the IDB receives 66% of Libor to match what the IDB pays on the loan, eliminating basis risk
- Wells Fargo would lower the swap rate to 4.89% to reflect the expected, amended index
- PFM expects the term length to be 5-7 years on the direct loan
- The remaining bonds would be refunded in 2011

All in Rate: 5.64%

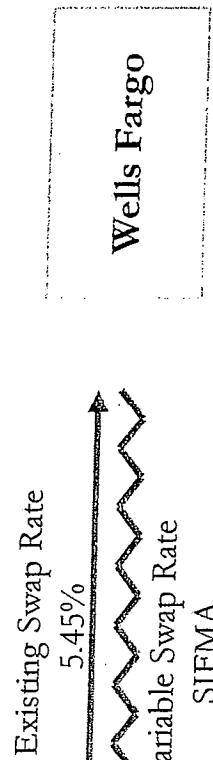

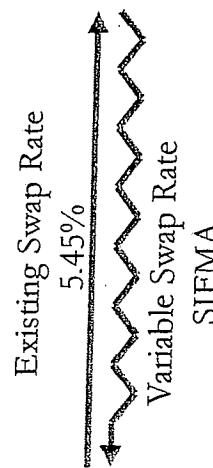

Alternative #2B continued – Direct Loan with Wells Fargo

- For the balance of the Series 2000 not refunded in 2010 a portion of the existing swap stays in place until second bond refunding in early 2011
 - IDB would pay the 5.45% and receive SIFMA on the remaining swap
 - IDB continues to pay higher fixed rate on remaining Series 2000
- In early 2011, we determine the best course of action based on market conditions.
 - Possible alternatives:
 - fixed rate refunding,
 - another direct loan, or
 - variable rate bonds
- The slightly higher rate the IDB will pay for a few months on the remaining portion of Series 2000 will be offset by a lower cost financing in early 2011
